Teaching and Examination Regulations for Master programmes (educational units)

Citation reference	Teaching and Examination Regulations (educational units) for Master programme Computer Vision & Data Science [full-time
Date of entry into effect	01-09-2025
Adopted by the Executive Board	03-06-2025
Consent from University Participation Council	03-06-2025
Legal basis	Section 7.13 WHW
Particulars	These Teaching and Examination Regulations concern the education of the study programme based on educational units.
Short description	These Teaching and Examination Regulations provide information on the nature, structure and content of the study programme as well as its assessments and examination.

Appendix 6 Special provisions 25

Chapter 1 General provisions

Article 1.1 Definition of terms

1 The terms used in these regulations have the same definition as the terms in the Higher Education and Research Act, unless explicitly determined otherwise in these regulations.

2 The following definitions also apply in these regulations:

a. executive board: the executive board of NHL Stenden and, where appropriate, the board of the institution;
b. examination committee: the examination committee appointed for the study programme;
c. NHL Stenden: NHL Stenden Hogeschool and, where appropriate, Stichting NHL Stenden Hogeschool;
d. study programme: the study programme of NHL Stenden to which these regulations apply.
e. module: group of educational units;
f. SIS: the student information system of NHL Stenden;
g. student: the individual enrolled at NHL Stenden to receive education and/or take assessments and examinations for the study programme;
h. assessment: an assessment within the meaning of the WHW. An assessment comprises all test methods, including written exams, oral exams, assessments, portfolios and assignments;
i. examination: the complete set of passed assessments as referred to in article 7.10 paragraph 2 of the WHW;
j. week: a calendar week, with the exception of the calendar weeks of the school holidays as listed in the year plan of NHL Stenden;
k. WHW: Higher Education and Research Act (Wet op het hoger onderwijs en wetenschappelijk onderzoek).

Article 1.2 Nature and scope

1 These regulations comprise the Teaching and Examination Regulations as referred to in Section 7.13 WHW.

2 These regulations apply to the study programme referred to in Appendix 1 and apply to students enrolled for this study programme, regardless of whether they were enrolled in previous academic years.

3 Students can only derive rights from these regulations for the period to which these regulations apply.

Article 1.3 Order of precedence

1 In case of contrariety between a provision of these regulations and a statutory provision, the statutory provision will prevail.

2 In case of contrariety between the provisions of these regulations, the provisions of the student charter (programme-specific part) for the study programme, other regulations of NHL Stenden or the SIS, the order of precedence is the order in which the documents are listed below, with a document listed earlier prevailing over a document listed later:

a these Teaching and Examination Regulations, with the exception of the appendices;
b the appendices to these Teaching and Examination Regulations;
c the student charter (programme-specific part);
d the other regulations of NHL Stenden;
e the SIS.

Article 1.4 Announcements

1 Announcements under these regulations to a student will be made in writing or electronically to the student's postal or e-mail address as registered with NHL Stenden.

2 Announcements under these regulations from a student to NHL Stenden will be made in writing or electronically to the postal or e-mail address of NHL Stenden set up for this purpose.

3 NHL Stenden may refuse a message sent electronically or attach further conditions to it if the reliability or confidentiality of said message is not sufficiently guaranteed given the nature and content of the message and the purpose for which it is used.

Chapter 2 Enrolment

Article 2.1 Admission requirements

1 The following admission requirement applies for the programme:

a Possession of a Bachelor's degree in higher professional education as referred to in Appendix 2, or

b Possession of knowledge, understanding and skills at the level of a Bachelor's degree in higher professional education as referred to in the student charter (programme-specific part).

2 The knowledge, understanding and skills referred to in paragraph 1 under b must be demonstrated by means of an investigation that, in the opinion of the executive board, is valid and reliable.

3 The executive board may set qualitative requirements in addition to the requirement referred to in paragraph 1 of this article. These requirements will be listed in Appendix 2. If qualitative requirements are set, the number of types total at least two.

4 The executive board admits the person who meets the requirements as referred to in paragraphs 1 and 3 of this article to the study programme. If the executive board has determined that a maximum number of people may be enrolled in the programme, an additional admission requirement is that this number may not be exceeded. The executive board will publish the procedure based on which admission will take place well in advance.

Article 2.2 Enrolment after 1 September and termination of enrolment

1 Enrolment after 1 September of the academic year will take place in accordance with the rules as set for this by the executive board.

2 Termination of enrolment ends the legal relationship between the student and NHL Stenden. If enrolment is interrupted, a student cannot derive any rights from termination of enrolment.

Chapter 3 Study programme and education

Article 3.1 Learning outcomes

1 The intended learning outcomes tie in with the level and orientation of the programme and are geared to the expectations of the professional field, the discipline and international requirements.

2 The learning outcomes of the study programme indicate what the student must have achieved when passing the final examination in terms of knowledge, understanding and skills. The learning outcomes are listed in Appendix 3. For each learning outcome is specified which educational unit assesses this.

Article 3.2 Study load, study duration and phases

1 The study load and the nominal study duration of the study programme are described in Appendix 1. The study load is expressed in credits, with one credit equalling 28 hours of study.

2 The study programme has a propaedeutic and a post-propaedeutic phase. The study load of the propaedeutic and the post-propaedeutic phase is described in Appendix 1.

3 The executive board may grant a student permission, at their request, to follow a curriculum for the study programme with a study load comprising more credits than determined under paragraph 1 of this article. The executive board will inform the student of its decision on the student's request within three weeks after receiving the request.

Article 3.3 Structure and specialisations of the study programme

1 The study programme is structured by means of study variants, as described in Appendix 1.

2 The study programme has the specialisations as listed in Appendix 1.

3 If the study programme comprises more than one specialisation, the executive board may, if they have nominated the programme for this, decide that a student only has access to one or more specialisations to be indicated. In that case, further provisions regarding this access are listed in Appendix 2.

Article 3.4 Termination of the study programme

The executive board may decide to terminate the study programme or any of its study variants. The students enrolled in the study programme or study variant will be given the opportunity to pursue their education without interruption for the study duration related to the study programme's study load remaining for the students, plus one year.

Article 3.5 Education

1 The study programme consists of a coherent set of educational units, with one or more educational units comprising a module. The educational units and modules of the study programme are described in Appendix 4.

2 At the request of a student, the executive board may, in special cases, replace one or more educational units as listed in Appendix 4 with one or more other educational units, unless this substantially alters the curriculum.

3 The actual organisation of education is described in Appendix 4.

4 The language in which the education is provided is described in Appendix 4. The education can be provided in a different language in case it concerns a guest lecture given by a foreign-language lecturer and in accordance with the provisions of the Language Code of Conduct.

Article 3.6 Evaluation of education
The executive board shall ensure periodical evaluation of education. The manner in which education will be evaluated is described in Appendix 5.

Article 3.7 Instructions
Those responsible for education for the study programme are authorised to give instructions for a proper educational procedure. Students must comply with these instructions.

Chapter 4 Study career counselling

Article 4.1 Study career counselling

1 NHL Stenden will provide individual study career counselling and monitor a student's study progress. In doing so, NHL Stenden will pay in any case particular attention to the counselling of students belonging to an ethnic or cultural minority whose participation in higher education is notably lagging behind participation of Dutch citizens who do not belong to such a minority.

2 The method of study career counselling is described in the Student Charter (programme-specific part).

Article 4.2 Educational facilities for students with a disability or chronic illness

1 The executive board will at the request of a student with a disability or chronic illness make effective adjustments to the education to be followed by the student and based on the student's needs, unless these facilities pose a disproportionate burden on NHL Stenden. The executive board will inform the student of its decision on the student's request within three weeks after receiving the request. This provision does not apply to provisions regarding assessments as referred to in article 6.3 paragraph 5.

2 The executive board may set out regulations for the measures to be taken.

3 The measures to be taken for students with a disability or chronic illness are described in the Student Charter (programme-specific part).

Article 4.3 Provisions for students with a Top Sports status and students with Top Entrepreneurs status

1 NHL Stenden offers students with a Top Sports status, given their sports obligations, and students with a Top Entrepreneurs status, given their entrepreneurs obligations, an achievable study programme, in so far as this can be reasonably required from NHL Stenden.

2 The executive board may set out regulations for the measures to be taken.

3 The measures to be taken for students with a Top Sports status and students with a Top Entrepreneurs status are described in the Student Charter (programme-specific part).

Chapter 5 Examination

Article 5.1 Final examination

1 The study programme is concluded with a final examination. The educational units of the examination are listed in Appendix 4. The educational units together form the components of the examination.

2 The examination as referred to in paragraph 1 of this article is passed if the educational units of that examination have been passed.

3 The date on which a student has passed the examination is the date on which the student has passed the last educational unit, as a result of which the student meets the standard referred to in paragraph 2 of this article.

4 The examination committee determines the results of the examination referred to in paragraph 1 of this article at least once a month.

5 At terms to be set by it, the examination committee may stipulate that not every educational unit has to be passed in order to establish that the examination has been passed.

6 If an assessment has been changed or replaced, the assessment from before the change will, in the academic year in which the assessment was changed or no longer offered for the first time, be offered twice to students who did not pass the assessment dating from before the change. Changes to an assessment do not include updates to the knowledge, understanding and skills to be tested.

7 The executive board stores the examination that has been passed and any projects produced in relation to the examination for a period of at least seven years.

Article 5.2 Education outside the Netherlands

A student requires permission from the executive board to follow education for the study programme outside the Netherlands. The executive board will inform the student of its decision on the student's request within three weeks after receiving the request.

Article 5.3 Diploma and diploma supplement

1 The examination committee awards a student a diploma as proof that the examination has been passed and that all other related statutory requirements have been met. To that end, the student must be enrolled in the study programme at the moment of passing the examination.

2 A student who is entitled to being awarded a diploma may request the examination committee not to award it yet, stating reasons therefor. The examination committee will inform the student of its decision on the student's request within three weeks after receiving the request.

3 The examination committee shall add an English-language supplement to the diploma that meets the European agreed standard format.

4 A student will be awarded one diploma for each examination.

5 In accordance with the provisions of Section 7.11a WHW, an examination committee will, at the request of the holder of a diploma as referred to in paragraph 1 of this article, issue a replacement diploma in connection with a name change of the person concerned as a result of the application of Section 1:4, subsection 4, Section 1:7, subsection 1 or Section 1:28b, subsection 2 of the Dutch Civil Code (Burgerlijk Wetboek) or Section 12 of the National Act on Dutch Citizenship (Rijkswet op het Nederlanderschap).

6 NHL Stenden will store a copy of the diploma and the diploma supplement for fifty years after awarding.

Article 5.4 Degree and degree title

1 The executive board awards the student who has passed the final examination a Master's degree with the degree title listed in Appendix 1 and states the degree awarded and the degree title on the diploma for the final examination.

2 The degree title listed in Appendix 1 may at all times be changed pursuant to statutory provisions.

Article 5.5 Cum laude designation

1 The examination committee will, on its own initiative, grant a student the designation 'cum laude' for the final examination if the student:

a has taken the assessments of each educational unit of the final examination no more than once and therewith passed the educational unit; and

b has obtained a collective result for all educational units of the final examination together of a non-rounded-off weighted average based on credits obtained of 8.0 or higher, or an equivalent result; and

c has not obtained more than a third of the scope of the final examination based on exemptions.

2 Exemptions granted will not be taken into account in applying the criteria for awarding the designation 'cum laude' as referred to in paragraph 1 of this article.

3 The examination committee shall include the designation 'cum laude' on the diploma for the final examination.

Article 5.6 Statement on results

1 A student who has passed more than one assessment and to whom no diploma as referred to in article 5.3 can be awarded, will, at his request, within seven years after termination of his enrolment from the study programme, receive from the examination committee a statement on results listing at least the assessments that the student passed, including the dates on which they were achieved. The examination committee will issue the statement to the student within three weeks after receiving the request.

2 In accordance with the provisions of Section 7.11a WHW, an examination committee will, at the request of the holder of a statement on results as referred to in paragraph 1 of this article, issue a replacement statement on results in connection with a name change of the person concerned as a result of the application of Section 1:4, subsection 4, Section 1:7, subsection 1 or Section 1:28b, subsection 2 of the Dutch Civil Code (Burgerlijk Wetboek) or Section 12 of the National Act on Dutch Citizenship (Rijkswet op het Nederlanderschap).

Chapter 6 Assessments

Article 6.1 Assessments

1 An educational unit comes with one or more assessments. The assessments of each educational unit are listed in Appendix 4.

2 Each assessment comprises an investigation to determine the knowledge, understanding and skills of a student, as well as an assessment of the results of that investigation.

3 An assessment is valid, reliable and transparent and in line with the assessment framework of NHL Stenden and the assessment plan and assessment programme of the study programme.

4 NHL Stenden will offer adequate education in preparation of an assessment.

Article 6.2 Examiners

1 The examination committee will appoint one or more examiners to administer an assessment and determine its results.

2 The examiners will provide the examination committee with the requested information.

Article 6.3 Method of assessment and assessment facilities for students with a disability or chronic illness

1 An assessment may be administered orally, in writing, using a different method or using a combination of methods.

2 The method of assessment is suitable to determine a student's knowledge, understanding and skills.

3 The method of assessment and the language in which the assessment must be administered are described in Appendix 4.

4 The examination committee may in special cases at a student's request decide on a different method of assessment. The examination committee will inform the student of its decision on the student's request within three weeks after receiving the request.

5 The examination committee will at the request of a student with a disability or chronic illness make effective adjustments to the assessments to be taken by the student and based on the student's needs, unless these facilities pose a disproportionate burden on NHL Stenden. The examination committee will inform the student of its decision on the student's request within three weeks after receiving the request.

Article 6.4 Offering assessments

1 An assessment is offered at least twice during an academic year.

2 Appendix 4 states, where necessary:

a the number and sequencing of assessments, and the times when they can be taken;

b the order in which, the periods of time during which and the number of times per academic year that the opportunity is given to take assessments;

c that passing assessments is a condition for admission to take other assessments.

3 NHL Stenden will inform a student of the day and time at which the assessments will be administered at least two weeks in advance.

4 During his enrolment a student is entitled to take the assessments belonging to the study programme and thus take the examinations for that study programme with due observance of the provisions of these regulations.

Article 6.5 Setting assessments

1 The examiner shall set an assessment.

2 Prior to an assessment, the examiner timely provides a sufficient image of the content and scope of the assessment, the manner in which the assessment must be taken and the rating method of the assessment.

3 At an assessment, the examiner provides sufficient information about the content and scope of the assessment, the manner in which the assessment must be taken and the rating method of the assessment.

Article 6.6 Registration

1 NHL Stenden will announce the registration procedure on time on NHL Stenden' intranet site. This shall include, at least, the requirement to register, the manner in which registration shall take place and the registration period applicable.

2 Under a registration requirement, a student without registration cannot take the test.

3 A student who has registered for an assessment will be considered to have taken this assessment.

Article 6.7 Report

The examiner or invigilator will write a report of the assessment in question.

Article 6.8 Instructions from the examiner or invigilator

1 The examiner or invigilator is authorised to give instructions to ensure that an assessment is administered properly. Students must comply with these instructions.

2 If an assessment contains a cover sheet with instructions, these instructions shall be construed as instructions from the examiner.

Article 6.9 Identification

1 When administering an assessment, the examiner or invigilator will determine a student's identity. A student is obliged to present valid proof of identification as referred to in the Compulsory Identification Act.

2 A student who does not meet the obligation referred to in paragraph 1 of this article will be excluded from the assessment. The report contains a note of students who failed to meet the obligation referred to in paragraph 1 of this article.

Article 6.10 Punctuality

1 A student is obliged to be present on time before the start of an assessment.

2 A student who is not present when an assessment starts will be excluded from the assessment, regardless to what is stated in article 7.1 paragraph 1.

Article 6.11 Assessment of assessment and determination of results

1 The examination committee will, with due regard for the WHW and these regulations, determine guidelines and instructions for the examiner to assess and determine the results of assessments.

2 The examiner assesses the assessment taken by a student and determines its results on the basis of the standards for assessment determined by the examiner and the guidelines and instructions provided by the examination committee.

3 If a student has taken an assessment for the second or subsequent time, the result for this assessment will be the highest result obtained by the student for this assessment.

4 The examiner may revise the result of an assessment in case of incorrect assessment and as a result of a court ruling or a decision on appeal.

5 The examiner shall determine a result for each assessment for which the student has registered, which result shows whether or not the student has passed the assessment.

6 The result of an educational unit and an assessment are expressed in the form of a mark or other rating.

7 If a result of an educational unit is expressed in the form of a mark:

a the result of an assessment shall be expressed as a mark with a decimal point on a scale from 1.0 to 10.0 or as a mark without decimal points on a scale from 1 to 10;

b the result of an educational unit shall be expressed as a mark without decimal points;

c the result of an educational unit that comprises more than one assessment, shall be the weighted rounded-off average of the results of the assessments;

d for the purpose of rounding off a mark that is not rounded off, the second or next decimal point is deleted and the first decimal point from 4 down will be rounded down and the first decimal from 5 up will be rounded up.

8 If an assessment was taken at an institution other than NHL Stenden, the executive board can convert the result of the assessment to an equivalent assessment result on the assessment scale that applies to this assessment at the study programme. NHL Stenden establishes policy rules for the conversion of the results of assessments.

Article 6.12 Registration, publication and verification of results

1 The examiner registers the result of an assessment in the SIS and announces it to a student by way of the SIS. This registration comprises complete proof for the student, except for any proof to the contrary provided by a student.

2 The examiner announces the result of an assessment to the student within three weeks after the assessment was administered.

3 The examination committee may, based on exceptional circumstances, extend the terms referred to in this article and will inform the student of this extension.

4 The examination committee will provide the student, at their request, with an overview of their registered assessment results. The examination committee may limit the issue of such copies to twice per academic year if there are no reasonable grounds for additional copies.

5 A student must regularly verify the registration of their assessment results in the SIS and immediately inform the examination committee of any inaccuracies. The registration will be considered to be approved by a student if they have not contested it within three months after the academic year in which the assessments were offered.

Article 6.13 Inspection of assessment

A student is entitled to inspect the assessment taken, the assessment thereof and the standards for assessment thereof for a period of two weeks after announcement of the assessment result as referred to in article 6.12, notwithstanding the rights of the student based on the General Data Protection Regulations. NHL Stenden may determine that this inspection only takes place on at least two different days and times, to be determined by them.

Article 6.14 Date of passing assessment and educational unit and consequences of passing educational unit

1 A student passes an assessment on the date on which the student has taken the assessment successfully.

2 A student passes an educational unit on the date on which the student has taken the assessment successfully as a result of which the student passes all assessments of the educational unit.

3 A student who passes an educational unit has obtained the related credits.

Article 6.15 Term of validity of passing assessment

1 The executive board may limit the term of validity of passed assessments, without prejudice to the executive board's authority to extend that term of validity in an individual case.

2 The term of validity of a passed assessment may only be limited if the knowledge tested or the understanding tested has become demonstrably obsolete or the skills tested have become demonstrably obsolete.

3 When limiting the term of validity of an assessment, any exceptional circumstances within the meaning of Section 7.51 subsection 2 WHW will, in reasonableness, be taken into account. In the event of exceptional circumstances as referred to in Section 7.51 subsection 2 WHW, the term of validity of a passed test will at least be extended by the duration of the financial support granted on the basis of Section 7.51 subsection 1 WHW.

4 Appendix 6 lists further provisions related to the implementation of this article.

Article 6.16 Exemptions

1 The examination committee may exempt a student, at their request, from taking an assessment. The examination committee will inform the student of its decision on the student's request within three weeks after receiving the request.

2 The examination committee will only grant exemption if a reliable investigation into the student's knowledge, understanding and skills demonstrates that the students possesses at least similar knowledge, understanding and skills as they would have obtained when passing the assessment from which exemption is granted.

3 A student who has been granted exemption will be considered to have passed the assessment. The examination committee registers an exemption granted in the SIS and announces it to the student via the SIS within a week after granting it.

4 Article 6.17 (Fraud) applies accordingly to this article.

Article 6.17 Fraud

1 If the examination committee has ascertained that a student has committed fraud in relation to an assessment, the examination committee may declare the assessment taken by the student invalid and may deprive the student of the right to take one or more assessments or examinations, to be determined by the examination committee, for a period of a year at most, also to be determined by the examination committee.

2 If the examination committee has ascertained that fraud has been committed in relation to an assessment, the examination committee may declare the assessment invalid for all students involved.

3 In case of serious fraud, the executive board, on a motion by the examination committee, may terminate enrolment of that student in the study programme.

4 Fraud is defined as each act or omission by a student that negatively affects the reliability of an assessment in regard of the knowledge, understanding or skills of the student to be tested or those of another student. Fraud within the meaning of this article at least comprises:

a obtaining information on the assessment prior to the assessment;

b acting contrary to assessment instructions during or for an assessment, which includes possession of an aid that is not permitted when taking the assessment;

c receiving assessment information from others during or for an assessment;

d demonstrating behaviour during an assessment intended to take cognisance of the assessment answers of other students;

e changing answers after taking an assessment;

f incorporating material that was previously produced material by the student, material from other persons or material from other sources in an assessment without justifying this in the prescribed manner;

g having another person take an assessment, which includes obtaining help and assistance when taking an assessment;

h inventing or forging research data for an assessment.

5 Committing fraud as referred to in this article also includes having others commit fraud, committing fraud with others, inciting fraud or attempting to commit fraud.

Chapter 7 Special provisions on written assessments

Article 7.1 Participation after start of the assessment and leaving the assessment room

1 The examiner or invigilator will permit a student to participate in the assessment until 30 minutes after the start of the assessment.

2 A student may not leave the assessment room until 30 minutes after the start time of the exam and afterwards only with the permission from the examiner or the invigilator. The examiner and the invigilator are entitled to walk the student out of the exam room.

Chapter 8 Special provisions on oral assessments

Article 8.1 Number of examiners

An oral assessment is administered by at least two examiners, unless decided otherwise by the examination committee.

Article 8.2 Public nature

1 An oral assessment is not public, unless decided otherwise by the examination committee.

2 The examination committee may refuse persons access to an oral assessment.

Article 8.3 Audio or video recording

The examiners may make an audio or video recording of an oral assessment.

Chapter 9 Examination committee and programme committee

Article 9.1 Examination committee

1 An examination committee as referred to in Section 7.12 WHW has been established for the study programme.

2 The Examination Committee Regulations apply to the examination committee.

Article 9.2 Programme committee

1 A programme committee as referred to in Section 10.3c WHW has been established for the study programme.

2 The Programme Committee Regulations apply to the programme committee.

Chapter 10 Special provisions

Special provisions concerning the study programme are listed in Appendix 6.

Chapter 11 Final provisions

Article 11.1 Legal remedies reference
Anyone taking a decision based on these regulations will indicate in it by whom, within which term and to which body objections or appeal can be lodged.

Article 11.2 Authentic text
In the event of contrariety between the Dutch text of these regulations and text in a different language, the Dutch text of these regulations will prevail.

Article 11.3 Unforeseen situations and hardship clause
1 The executive board decides in cases not covered by these regulations.
2 If the application of these regulations would lead to substantial unfairness, the executive board can depart from the provisions of these regulations in special cases regarding matters within its authorities. If the executive board makes use of this possibility, it will take into account the nature, content and scope of this provision and these regulations in the decision making.
3 If the application of these regulations would lead to substantial unfairness, the examination committee can depart from the provisions of these regulations in special cases regarding matters within its authorities. If The examination committee makes use of this possibility, it will take into account the nature, content and scope of this provision and these regulations in the decision making.

Article 11.4 Appendices
The appendices as mentioned in these regulations are part of these regulations.

Article 11.5 Entry into force, amendments and citation reference
1 These regulations are effective as of 1 September 2025. Previous Teaching and Examination Regulations are superseded by these regulations.
2 The executive board may modify these regulations during the academic year on the basis of amendments to statutory provisions. In other cases, the executive board may modify these regulations during the academic year unless this harms a student's interests.
3 These regulations will be referred to as: ‘Teaching and Examination Regulations (educational units) of the Master programme’, followed by the name of the study programme.

Appendix 1 Study programme

Name	Computer Vision & Data Science
International name	Computer Vision & Data Science
Study programme code (RIO)	49397
Level	master's programme, EQF-level 7, NLQF-level 7
Study variants	full-time
Location(s)	Leeuwarden
Degree and degree title	Master of Science
Specialisations	None
Particulars	None

Study load of the programme	60 ECs
Nominal study duration of the programme	1 year
Annual study load of part-time variant (7.4 and 7.4b WHW)	Not applicable
Nominal study duration of part-time variant	Not applicable

Appendix 2 Enrolment

Required Bachelor's degree (7.30b subsection 1 WHW)	Bachelor's degree
Qualitative requirements (7.30b subsections 2 and 5 WHW)	Yes, the student must meet the following qualitative requirements: • demonstrable solid programming skills and the ability to communicate technical work adequately; • mathematical knowledge and skills required to understand and explain the principles of computer vision and data science; • adequate motivation for a full-time one-year ambitious and challenging programme.
Quantitative requirements (7.30 subsections 3 and 4 WHW)	Yes, a maximum inflow of 25 students per academic year.
Premasters	No

Appendix 3 Learning outcomes

The learning outcomes of the study programme can be found on [URL]. [Instructions: State URL of website/intranet where the learning outcomes are published.]

Learning outcome	Intended exit level	Educational units
1. The student designs, develops and tests independently, within a team and methodologically correct, machine-learning algorithms that automate visual inspections that meet the customer's specifications.	Hbo master	Learning Outcomes in the final level context: design, develop and test machine-learning algorithms, create and manage datasets, in practice applicable algorithms, professional development.
2. The student creates and manages, in collaboration with domain expert(s), a representative annotated and balanced dataset with the required quality to develop and test machine-learning algorithms.	Hbo master	Learning Outcomes in the final level context: design, develop and test machine-learning algorithms, create and manage datasets, in practice applicable algorithms, professional development.
3. The student optimizes algorithms, independently and based on customer specifications, and makes them scalable so they can be applied in practice.	Hbo master	Learning Outcomes in the final level context: design, develop and test machine-learning algorithms, create and manage datasets, in practice applicable algorithms, professional development.
4. The student develops themself proactively and with a high degree of responsibility, to guarantee their own sustainable employability and thus also contribute to the development of professional practice and the knowledge domain.	Hbo master	Learning Outcomes in the final level context: design, develop and test machine-learning algorithms, create and manage datasets, in practice applicable algorithms, professional development.

Appendix 4 Curriculum

Appendix 4 is included as separate appendix to the Teaching and Examination Regulations. Information regarding the study programme can also be found in the educational catalogue.

Appendix 5 Evaluation of education

In order to guarantee the quality of education, the education is periodically evaluated. Input from students is essential for this. The evaluations form the basis for actions for improvement. You will receive more detailed information about the education evaluations during the academic year.

Appendix 6 Special provisions

No special provisions
